Address : Nilor, Thanda Pani, Tehsil & Dist. Islamabad

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in PHP development, WordPress customization and responsive web design. Skilled in building clean, user-friendly websites and web applications using HTML, CSS, JavaScript, PHP, React JS, Laravel, MySQL and Python (basics). Strong interest in backend development, problem-solving and continuous learning.

CORE SKILLS

Web Development	PHP, HTML5, CSS3, JavaScript, React JS
Programming Languages	Python (Basics), PHP, JavaScript
CMS	WordPress Development & Customization
Backend & Database	Laravel, REST APIs, MySQL, XAMPP
Professional Skills	Responsive Web Design, UI Basics, Problem Solving, Team Collaboration

EDUCATION

Muhammad Nawaz Sharif University of Agriculture, Multan — Bachelor of Science in Computer Science (2022 – 2026) — (cgpa : 3.34)
Punjab Group of Colleges, Khanewal — Intermediate (2020 – 2022)

ACADEMIC PROJECTS

Skill Hive — Final Year Project | React JS, Laravel, MySQL

A skill-driven hiring platform that connects students with companies by recommending suitable candidates through an algorithmic skill-matching and ranking system.

- Built role-based dashboards for Students, Companies and Admin with structured project and candidate workflows.
- Implemented a two-phase ranking approach that combines skill match percentage with interview scores.
- Supported company project posting, student applications, admin approval and candidate recommendation features.

Vendo — E-Commerce Website | Laravel, MySQL, Bootstrap

- Built a Laravel-based online store with product listings, cart and order management, backed by a MySQL database.
- Deployed the full application to live shared hosting, resolving production configuration and database connectivity issues.
- Redesigned the product detail, cart and search pages with a clean, responsive light theme.

Flower Ordering App | Flutter, Android Studio, Firebase

- Developed a cross-platform mobile app for ordering flowers, built in Flutter using Android Studio.
- Used Firebase for authentication, real-time database and order management.

Food Ordering Web Application | MERN Stack

- Built a full-stack food ordering system with user authentication, menu display, order management and RESTful APIs.
- Used MongoDB for data storage and Node.js/Express.js for backend application logic.

Obstacle Avoiding Car | IoT, NodeMCU

- Built an IoT-based smart car using NodeMCU and ultrasonic sensors to detect and avoid obstacles automatically.

- Integrated motor drivers and sensor logic to control real-time obstacle detection and navigation hardware.

Pong Game | Graphics & Animation

- Designed visual assets and animations for a classic two-player Pong game to improve gameplay presentation.

INTERNSHIP EXPERIENCE

Web Development Intern | onlinecer Solutions | June 2024 – August 2024
Completed a three-month web development internship, working on real-world web applications using PHP, Laravel, React JS and MySQL. Contributed to building and customizing web pages and features and gained hands-on experience deploying an application to a live hosting environment and resolving configuration and database connectivity issues. Worked under the guidance of a supervisor, took on assigned tasks independently, and strengthened my skills in debugging and responsive design.

COURSES & TRAINING

HTML, CSS, JavaScript, PHP, WordPress, Python (Basics)
